Drawdown

Time Period: 28/02/2013 to 31/12/2025

Drawdown refers to the time taken for performance to recover from the trough (the lowest point of the portfolio's performance to-date) back to its previous peak (its highest point before the decline).

Initial Investment	Peak	Trough	Days to recover
	21/02/2020	19/03/2020	
£100,000	£164,297.77	£132,911.16	231

Past performance does not predict future performance. It should not be the main reason for making an investment decision. The value of investments and any income from them can fall as well as rise. Performance is shown after deduction of portfolio management costs, but before deduction of platform costs. The performance of investor portfolios may differ from the Model Portfolio shown above for several reasons, including differences in the timing of an initial investment and subsequent portfolio changes, and also the availability of certain funds on various platforms.
